Press Release

Sewer Construction to Bring Temporary Closure on NE 99th Street (NE 105th Avenue – NE 107th Avenue)

Vancouver, WA – NE 99th Street is scheduled to be closed temporarily between NE 105th Avenue and NE 107th Avenue for sanitary sewer construction. The closure is expected to begin on Monday, October 4, 2021, and be in place until February 28, 2022. Closure start and end dates are weather dependent.

Access will be maintained for residents living along the road, as well as for emergency service vehicles, mail, and other deliveries. Other through traffic will need to use alternative routes. A signed detour route will be in place during construction.

Clark Regional Wastewater District (District) awarded Tapani, Inc. of Battle Ground, WA, a \$2.4M contract to construct approximately 1,050 feet of a 24-inch diameter gravity sewer between NE 104th Avenue and NE 108th Avenue. The District has been working with Clark County to coordinate the installation of sanitary sewers along the NE 99th Street corridor as part of the County's NE 99th Street County Road Project (NE 94th Avenue to SR503). This portion of the sewer is approximately 20 to 30 feet deep and is being constructed in advance to aid in future construction of the County's Road Project. The remainder of the sanitary sewers along NE 99th Street between NE 94th Avenue and NE 110th Avenue will be installed during construction of the County's Road Project which is scheduled to follow in 2022-2024.

If you have questions or comments about the project, please contact the project manager by phone or email.
