

NE 20th Avenue Sewer Pipeline

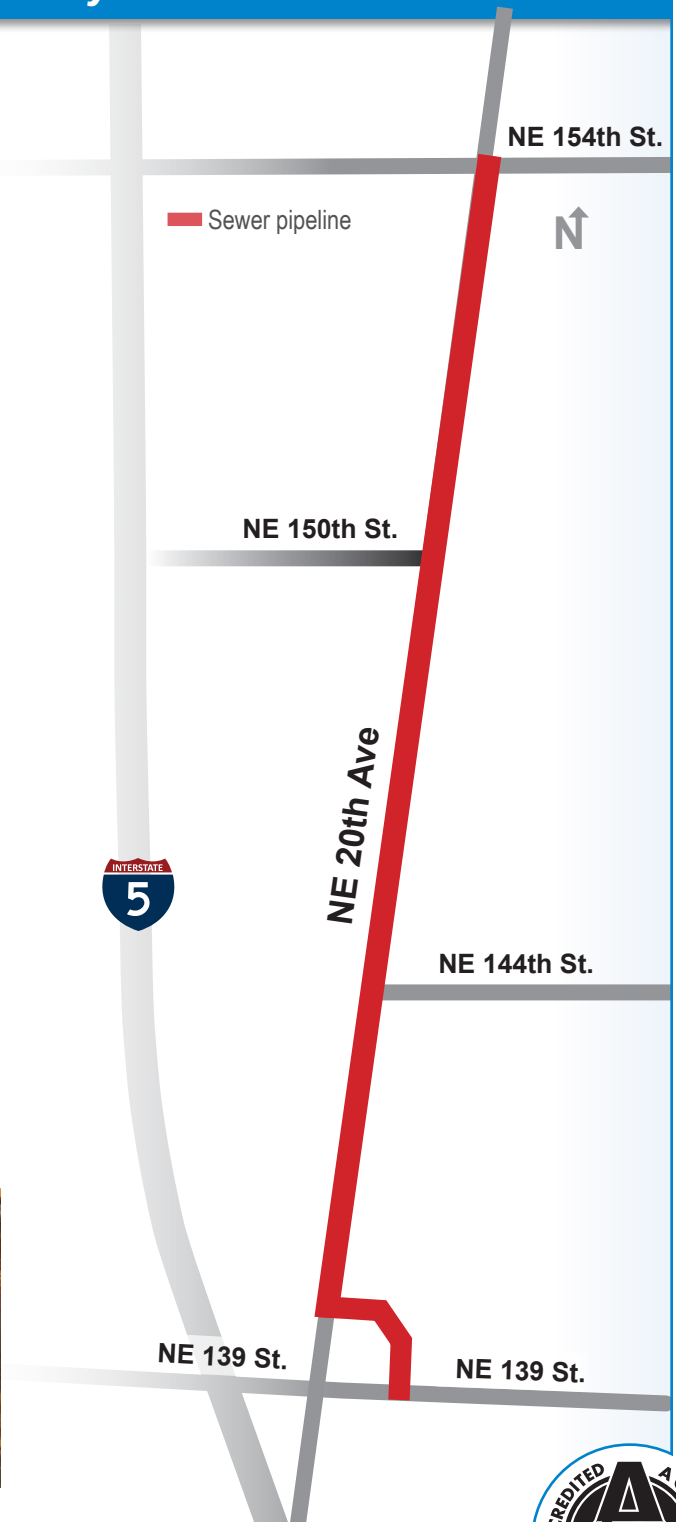

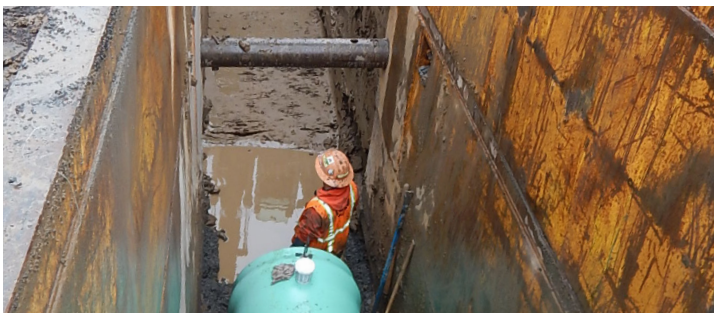

An important investment in Clark County's future

The NE 20th Avenue Sewer Pipeline project will install just over a half mile of new 30-inch diameter sewer pipe in NE 20th Avenue between NE 139th Street and NE 154th Street.

This project is needed to support planned future growth and economic development in the area and north Clark County, including the City of Ridgefield. Construction is estimated to begin in Spring 2022 and finish in Fall 2022.

This investment in new sewer infrastructure will provide continued reliable and effective service for our customers for at least another 50 years, while at the same time protecting public health and the environment.

Careful planning is taking place to minimize impacts to local businesses and the travelling public. Construction to install the sewer will use open-cut excavation methods, which consists of digging a trench, laying pipe, and backfilling. Sewer service will be maintained during construction.

What to expect during construction

Construction of the sewer pipeline will impact businesses, residents, and the travelling public along NE 20th Avenue and parts of NE 139th Street (i.e., at the intersection of NE 20th Avenue and NE 139th Street.)

The District is committed to maintaining regular and consistent communication with affected businesses and residents to minimize and mitigate the impacts of construction. The District will provide as much notice as possible of any temporary road closures or impacts to local businesses and residents.

Schedule

There is a great deal that needs to be completed before construction can begin, including detailed design and engineering, acquisition of easements and permits, and selecting a construction contractor through a competitive bid process.
