Press Release

Clark Regional Wastewater District Awards Construction Contract for NE 20th Avenue Sewer Pipeline Project

Vancouver, WA – The Clark Regional Wastewater District (District) Board of Commissioners awarded a \$4.75 million contract to Rotschy, Inc. of Vancouver, Washington for the construction of the NE 20th Avenue Sewer Pipeline. Located along NE 20th Avenue between NE 139th Street and NE 154th Street, the project supports continued growth and economic development along the I-5 Discovery Corridor, including the City of Ridgefield. Construction is scheduled to begin in fall 2022 and be completed in spring/summer 2023. The project is funded from connection charge revenue, which is collected from new development.

The NE 20th Avenue sewer project will construct approximately 3,700 feet of 30-inch diameter sewer and is designed to provide wastewater capacity for the next 50 years. Following construction of the new pipe, services will be transferred, and the existing sewer line will be abandoned. Existing sewer services will remain in operation during construction. The existing sewer conveys approximately 2 million-gallons-per-day of wastewater and ranges in pipe size from 10-inches to 18-inches in diameter.

“We are proactively investing in the collection system, providing capacity for the future,” said Heath Henderson, Engineering Director.

Construction of the sewer pipeline will impact traffic along NE 20th Avenue. Work will generally be located in the center of the roadway, maintaining open lanes of traffic in both directions. Careful planning is taking place to minimize impacts to local businesses and the travelling public. More information will be provided regarding anticipated construction schedule and impacts.

For more information about the project or to sign up to receive project updates visit www.crwwd.com/projects/ne20thavepipeline. If you have questions about the project, please contact the project manager by phone or email.
