Project Definition:

Background. Annual investment in proactively addressing sewer repairs before they become costly unplanned emergencies or sanitary sewer overflows. The program addresses structural and re-occurring maintenance issues. Projects are identified by Operations and Engineering review of maintenance records and the District's Risk Assessment Tool. Annual projects aim to address the highest risk pipe and/or pipes with a return on investment of 5 years or less.

Objective. Maintain reliable service by repairing gravity sewers that carry high risk or have costly operational needs.

Scope of Work. Projects include repair for mainlines and laterals.
